in Furniture, Decorative Items and Homeware Design Category, 2018 - 2019.

Memoria
by **Giacinto Fabà**

Table: The Memory table shows itself naturally. The strengths are the design of the iron legs and the solid oak top. Each leg is formed by two slabs shaped with lasers and wedged together without welding to form a cross-shaped profile with four equal sides, a Greek cross profile. The wooden top is obtained from two 6 cm thick slabs obtained from the same oak and positioned so that the veins form the famous "open spot". The wood shows the signs of aging that remain a trace and memory on the table.
